Thermopanel 10mm PVC Boards

The cost effective alternative to Altro walls, tiles, profile cladding and paint.

The Reasons Why!

For both 'new build' projects and refurbishment schedules, the best solution for hygienic wall and ceiling linings is often not the one with the lowest 'first glance' cost.

Architects and major specifiers up and down the U.K. realise that the initial cost of the surface you see is often only the tip of the iceberg when true accountability becomes known.

Our 10mm p.v.c. cladding panels are the 'fit and forget' top specification answer when multiple-criteria situations exist. Developed to compliment our 'Total Solutions' range, 10mm

Thermopanel can be fixed directly to stud partitioning in new build situations or straight on to existing substrates during refurbishment work, negating the costly

linings or wet trades required as a basis for less substantial

sheeting systems.

**Save time,
save money.**

Check out the benefits of 10mm Thermopanel yourself **NOW!** and ask for a **FREE** quotation on your next project.

Unique panel, unique service.

Creamery

School Kitchen

Food Processing Plant

Benefits

- Fixes direct to blockwork or existing substrates
- Eliminates need for plaster boards and wet trades
- Fix to stud partitions or framework
- Tested to Class O fire regs (a must in today's climate)
- Tested 'foodsafe' in contact with foodstuffs
- Minimal thermal expansion of panels (ie no bowing/ripple effect)
- Open texture rear face - max adhesion - thermal qualities
- Ceiling tile applications - remove tiles - wash - refit!!
- Panel sizes from 1200 wide x 2000 to 5000 long
- Ceiling Systems 600 x 600/1200

It costs nothing to call **0500 888818**
