WITH ALL THE

design

FLEXIBILITY
YOU WILL EVER NEED

Hygienic[®]
(CLAD & CLEAN) LTD
ESTABLISHED 1988

SUPERIOR LININGS VERSATILE + PERMANENT

The Hygenic Installations Group is now recognised as the leading specialist in hygienic vapour sealed linings for garages and car washes. We have gained this recognition by the quality of our products, service and genuine commitment to our clients.

The Hygenic proven product range, known as the Clad + Clean System, is specified by major Petrochemical Companies throughout the UK, from simple open jet wash screens to sophisticated design and colour co-ordinated multi-bay car wash centres. By working in partnership with companies and their advisers, we have an in-depth understanding of their needs and special requirements.

Hygenic offer a choice of infinitely adaptable and proven products. Colour coded to your individual needs, with curved or roll formed corner details, these will greatly enhance any forecourt area. All Hygenic linings are maintenance free and prevent water penetration of adjoining walls and buildings. In addition they retain their good looks, staying fresh and attractive and greatly reducing both moss and mould growth.

Attractive roll formed cill detail

Maintenance free - Fit and forget!

Flush fitting, vapour sealed lights incorporated in ceilings

Angled cills to window areas

Wide choice of colour

*INFINITELY ADAPTABLE
TO YOUR PARTICULAR STYLE
OR DESIGN REQUIREMENTS*

Hygenic products are made to take the knocks, they are tough and impact resistant. Because of this we give a generous, no-nonsense

Ten Years Guarantee on materials plus a
Three Years Guarantee on actual installations.

We are delighted to help on any cladding problem, large or small, at any stage. Our expertise and friendly advice are freely available. We have a wealth of knowledge that really can save you considerable time and expense, whether you are involved in new build projects, re-furbishment or upgrading, it pays to talk to Hygenic.

*Pleasing appearance -
with high impact resistance*

*Eliminates water
penetration*

Hygenic[®]
(CLAD & CLEAN) LTD

ESTABLISHED 1988

A WATERTIGHT CASE FOR USING HYGENIC

- Tiles really are outdated, even on expensive installations water soon penetrates the grouting. Frost quickly gets to work resulting in cracked or broken tiles. Also tiles are not impact resistant.
- Wiggly tin appears to offer a quick cheap answer to car wash areas - in reality prices are about the same as genuine 'Clad + Clean' linings as used exclusively by Hygenic. Wiggly tin is vulnerable to dents and scratches. Rust spreads rapidly under the thin surface coating. Problems are also encountered due to corrosive reaction caused by some final polishes on fixing pins.
- Hygenic sealed panels are totally waterproof. They are highly impact resistant, maintenance free, offer excellent dimensional stability, superior insulation properties and are easily cleaned.
- Exits/entrances are protected with white Electrophonic corners. Ultra-hi-impact rubber bump rails are also available.
- Hygenic provide an unequalled nationwide service with a high degree of flexibility, at costs that cheer our clients.
- All Hygenic 'Clad + Clean' products are available in flat-pack form, with full instructions, for your own fitters to install.
